LETTER OF TRANSMITTAL

GENERAL STATEMENT OF CEREAL PRODUCTION IN THE UNITED STATES.

Grain production in the United States	1
Table I.—Acreage and production of principal cereals.....	1
Table II.—Cereal production, with percentage of increase and per capita: 1850-1880	1
Grain production elsewhere	2
Table III.—Estimated grain production.....	2
Grain consumption per head of population.....	3
Table IV.—Production and consumption in different countries.....	3
Cereal exports	3
Table V.—Exports of breadstuffs from 1790 to 1816, inclusive	4
Table VI.—Exports of breadstuffs from 1817 to 1862, inclusive	4,5
Table VII.—Quantity and value of wheat of domestic production exported from the United States from 1860 to 1880, inclusive	5
Table VIII.—Quantities of wheat of domestic production exported from the United States from 1862 to 1880, inclusive	6
Table IX.—Quantities of corn of domestic production exported from the United States from 1862 to 1880, inclusive.....	6
Table X.—Quantities of wheat flour of domestic production exported from the United States from 1862 to 1880, inclusive.....	7
Table XI.—Quantity and value of wheat flour of domestic production exported from the United States from 1860 to 1880, inclusive.....	7
Table XII.—Quantity and value of corn of domestic production exported from the United States from 1860 to 1880, inclusive	8
Table XIII.—Quantities of corn meal of domestic production exported from the United States from 1862 to 1880, inclusive.....	8
Table XIV.—Quantities and values of corn meal of domestic production exported from the United States from 1860 to 1880, inclusive	9
Distribution by states.....	10
Table XV.—Total cereal production by states, and per cent. of total produced by each	10

DISTRIBUTION OF THE CEREAL PRODUCTION IN ACCORDANCE WITH GEOGRAPHICAL, PHYSICAL, AND CLIMATIC FEATURES.

Distribution in accordance with topographical features.....	11
Table XVI.—Distribution of cereal production in accordance with the topographical features of the country.....	11
Table XVII.—Distribution of cereal production by drainage basins.....	12,13
Distribution according to elevation	13
Table XVIII.—Distribution of cereal production in accordance with the elevation above sea-level.....	13
Distribution according to climatic conditions	14
Table XIX.—Distribution of cereal production in accordance with the mean annual temperature.....	14
Table XX.—Distribution of cereal production in accordance with the mean temperature of July	14
Table XXI.—Distribution of cereal production in accordance with the mean temperature of January	15
Table XXII.—Distribution of cereal production in accordance with the annual rainfall	16
Table XXIII.—Distribution of cereal production in accordance with the rainfall of the spring and summer	16
Soils of the grain-growing regions of the United States	16
Classification of soils according to origin	16

HISTORY OF THE CEREALS.

Definition of cereals.....	17
Varieties of cereals.....	17
Crossed varieties, or hybrids	17
Change of seed.....	17

TABLE OF CONTENTS.

PHYSICAL AND CHEMICAL CHARACTERS.

	Page.
Relations of grain to moisture	28
Hygroscopic characters	29
Table XXIV.—Loss and gain in weight of grain due to spontaneous loss and gain of moisture.....	31
Chemical composition.....	32
Explanation of signs used in the tables	33
Table XXV.—Chemical composition of American cereals and cereal products.....	34-48
Winter wheat, kernel	34, 35
Winter wheat, California, kernel	35
Spring wheat, kernel	35
Wheat flour	36
Graham flour	37
Wheat bran, middlings, and shorts	37
Maize kernel, Flint varieties	37, 38
Maize kernel, Dent varieties.....	38, 39
Maize kernel, sweet varieties	39
Maize kernel, unclassified varieties	40
Hominy	40
Corn meal	40
Various waste products from maize	40
Maize cob	41
Oats, kernel	41
Oatmeal	41
Barley, kernel	42
Barley products	42
Brewers' grains	42
Malt sprouts	42
Rye, kernel	42
Rye flour	43
Rye bran	43
Buckwheat, kernel	43
Buckwheat flour, farina, and groats	43
Rice	43
Sorghum seed	44
Miscellaneous cereals	44
Straw	44
Corn fodder and stover—fresh	44
Corn fodder and stover—field-cured or dried	44
Ensilaged corn fodder	45
Sorghum leaves	45
Sorghum—stripped stalks	45
Sorghum—bagasse	45
Notes pertaining to some of the analyses of the preceding table	46, 48
Method of analysis	48, 49
Preparation of the sample	48
Determination of ash	48
Determination of albuminoids	48
Determination of fiber	48
Determination of water	49
Determination of fat	49
Determination of carbohydrates	49

COST AND METHODS OF PRODUCTION.

Special schedule	49-52
General questions	53
Table XXVI.—Number, size, and tenure of farms	53
Estimating the cost of grain production	55
Table XXVII.—Cereal crops of New York	56
Mishaps to crops	58

DISTRIBUTION AND PRODUCTION OF THE SIX PRINCIPAL CEREAL CROPS.

WHEAT.....	60-89
Table XXVIII.—Wheat crop of 1879 (census of 1880)	60
Table XXIX.—Wheat production per head	60
Table XXX.—Estimated crops	61
Table XXXI.—Wheat crop of 1839 (census of 1840)	61
Table XXXII.—Wheat crop of 1849 (census of 1850)	62
Table XXXIII.—Wheat crop of 1859 (census of 1860)	62
Table XXXIV.—Wheat crop of 1869 (census of 1870)	62
History of wheat	64

TABLE OF CONTENTS.

V

	Page.
Varieties of wheat.....	65
Table XXXV.—Showing number of grains of wheat per pound avoirdupois and per bushel of 60 pounds.....	67
Table XXXVI.—Albuminoids in the dry matter of wheat (kernel) grown at Rothamsted for ten successive years on the same plots of ground.....	68
The time of cutting wheat	70
State of weather and of the development of the grain.....	71
Relative yield of wheat at each cutting	71
Relative chemical composition of wheat	72
Table XXXVII.—Yield and composition	72
Table XXXVIII.—Wheat receipts at Chicago	74
The Red River region	74
Oregon and Washington	75
California	76
Table XXXIX.—Harvesting crew.....	76
Diseases of wheat.....	79
Rust, or mildew	79
Smut	81
Weeds injurious to wheat	82
Insects injurious to wheat.....	82
The Hessian fly	82
The wheat midge	83
The joint-worm	83
The chinch-bug	83
The army-worm	84
The fall army-worm	84
The wheat-head army-worm	84
The Rocky Mountain locust	85
The stalk-borer	85
Species of minor importance	85
Insects injuring stored wheat	85
Exports of wheat	86
Table XL.—Export of flour from Philadelphia and New York.....	86
Table XLI.—Exports of wheat and wheat flour since 1790 (by decades).	87
British wheat production	87
Table XLII.—Total area and acreage under crop in England, Great Britain, and the United Kingdom for 1880 and 1879..	87
Table XLIII.—Total acreage under wheat, barley, and oats in Great Britain, from 1781 to 1880, inclusive	88
Table XLIV.—Acreage under wheat in the United Kingdom, yield, production available for bread, and imports.....	88
Wheat production of the world.....	88
Table XLV.—Estimated wheat production of various countries	89
Table XLVI.—Principal wheat-exporting countries	89
Table XLVII.—Principal wheat-importing countries	89
INDIAN CORN	90-110
Table XLVIII.—Indian corn production per head	90
Table XLIX.—Estimated acreage and production of Indian corn	90
Table L.—Indian corn crop of 1879 (census of 1880).	90
Table LI.—Indian corn crop of 1839 (census of 1840)	91
Table LII.—Indian corn crop of 1849 (census of 1850)	91
Table LIII.—Indian corn crop of 1859 (census of 1860)	91
Table LIV.—Indian corn crop of 1869 (census of 1870)	91
Distribution according to climate.....	92
History of Indian corn	93
Natural history of Indian corn	96
Varieties of Indian corn	97
Cultivation of Indian corn	98
Planting	98
Change of seed	99
Summer culture	99
Harvesting	100
Production of Indian corn in the different regions.....	100
Yield of Indian corn	101
Weights and measures used for Indian corn	101
Table LV.—Relative proportion of shelled corn and cob in corn in the ear	102
Chemical composition of Indian corn	102
Table LVI.—Average composition of Indian corn	102
Table LVII.—Average composition of Flint and Dent corn	103
Exports of Indian corn	105
Table LVIII.—Exports of corn and corn meal since 1790	105
Use of Indian corn in manufactures.....	106
Indian corn as fuel.....	107
Diseases and mishaps of Indian corn	107

TABLE OF CONTENTS.

	Page.
Insects injurious to maize	108
I.—Indications.....	108, 109
II.—Remedies and preventive measures.....	109, 110
OATS	111-116
Table LIX.—Actual production, by decades, etc	111
Table LX.—Estimates of the United States Department of Agriculture of acreage and production of oats: 1870-1880 ..	111
Table LXI.—Oats crop of 1879 (census of 1880)	111
Table LXII.—Oats crop of 1839 (census of 1840)	112
Table LXIII.—Oats crop of 1849 (census of 1850)	112
Table LXIV.—Oats crop of 1859 (census of 1860)	112
Table LXV.—Oats crop of 1869 (census of 1870)	112
Table LXVI.—Distribution according to elevation above the sea	113
Table LXVII.—Distribution of crops according to July temperature	113
History of oats	113
Natural history of oats	114
Cultivation of oats	114
Oatmeal	114
Chemical character of oats	115
Varieties of oats	115
Mishaps to oats	116
Insects injurious to oats	116
BARLEY	117-121
Table LXVIII.—Barley crop of 1879 (census of 1880)	117
Table LXIX.—Production of barley	118
Table LXX.—Acreage and production of barley	118
Table LXXI.—Barley crop of 1839 (census of 1840)	118
Table LXXII.—Barley crop of 1849 (census of 1850)	118
Table LXXIII.—Barley crop of 1859 (census of 1860)	118

LETTER OF TRANSMITTAL.

NEW HAVEN, CONN., November 1, 1881.

Hon. FRANCIS A. WALKER,
Superintendent of Census.

DEAR SIR: In virtue of the commission vested in me, I have the honor to present herewith a report on the production of cereals in the United States in the census year of 1880, with such tables, maps, and other data as are pertinent to the subject.

The general arrangement of the subject-matter of the report is as follows:

1. A general statement of cereal production in the United States.
2. The distribution of cereal production according to geographical, physical, and climatic features.
3. A general statement regarding cereals, their history, natural history, characters, and the conditions of their growth and culture.
4. Their general physical and chemical characters.
5. Certain general facts relating to the cost and methods of their production.
6. A more detailed statement of the distribution and production of each of the six principal cereal crops.
7. History of agriculture in the United States, especially in its relations to cereal production.
8. Various facts and conditions pertaining to cereal production in the United States.
9. Relations to live-stock and certain manufacturing industries.
10. Movement of cereals and grain exports.
11. Tables of production.

Yours, respectfully,

WM. H. BREWER,
Special Agent.
